

# METRE-GENERAL, INC.

Metre-General, Inc. has been selling wastewater treatment systems since 1988. Over the past several years we have become aware of applications such as phosphating processes that produce small quantities of water with low concentrations of heavy metals. We have developed a revolutionary system specifically for these applications, with the user in mind. We are proud to bring to you the field tested OCTOLIG® ENVIRO—4000.

Need Environmental Compliance And Want An Alternative To Evaporation?

## The OCTOLIG® ENVIRO—4000

- Removes particulate and dissolved heavy metals.
- Uses standard filter cartridges and refillable Octolig® filters.
- Provides a last line of defense before discharge.
- Shipped fully assembled.
- Easy to install.
- Entire unit can be moved with a hand truck or forklift.
- Actual field operations indicate that used filters pass TCLP tests and can be disposed of easily.

### More Advantages

- Low initial capital investment.
- Monthly operating costs are a fraction of associated costs for evaporation.
- Replacement filters and media are available in conveniently sized quantities.
- Easy trouble-free operation.
